Introduction

The purpose of this guide is to help you select the best Baxta coating system to protect your property. Consideration should be given to the substrate, environmental conditions and application methods.

The document is to be considered as a guide only. If further assistance is required, please contact BAXTA engineered Coatings on 1300 852 240 or visit our website www.baxta.com.au

System Selection

The following is to be used as a guide only and does not include all necessary section details or references to specific finishing systems. Each project will have individual design, surfaces and finishing requirements.

For assistance in selecting the appropriate paint system and products for your project please contact Baxta Engineered Coatings.

Selecting the correct paint system requires a variety of factors to be taken into account to ensure that the best technical solution is achieved.

Environmental conditions

When selecting a paint system, it is vitally important to work out the conditions in which the building or facility is to operate. The following factors must be taken into account, humidity, temperature, UV radiation, exposure and mechanical damage

Substrate

The surface preparation, the paint products used and the total system will depend mainly on the substrate to be protected.

Durability

The durability required for a paint system is assumed to be the period of time which passes until maintenance is required for the first time after application.

Application process

Consideration needs to be given to the various stages of construction on any particular project and when the paint system needs to be applied.

Our skilled personnel are always available to assist our customers in selecting the most adequate coating system.

For further information, please contact Baxta Engineered Coatings

Baxta Systems Guide Render

Warranty	Key Features
15 Year Warranty Available *	<p>BAXTA Premium High-Performance Membrane Systems</p> <ul style="list-style-type: none"> • Most durable • Greatest flexibility (crack resistance) • Low maintenance • High level of water repellency • High resistance to dirt and mold • Vapour permeable
15 Year Warranty Available *	<p>BAXTA Texture Render Systems</p> <ul style="list-style-type: none"> • Stylish, long life coatings with attractive coloured texture finishes • Pigmented trowel-on, no paint required • Flexible and crack resistant • Water repellent • Low maintenance • Vapour permeable
10 Year Warranty *	<p>BAXTA Premium High-Performance Membranes</p> <ul style="list-style-type: none"> • Flexible and crack resistant • Water repellent • Resistance to dirt and mould • Low maintenance • Vapour permeable
7 Year Warranty *	<p>BAXTA Matte Finishes</p> <ul style="list-style-type: none"> • Stylish Mediterranean aesthetics achieved • High build roll-on coatings for economical matte finishes • May require general maintenance • Vapour permeable

BAXTA recommends that you always contact us to confirm the most suitable **BAXTA** system for your project.
